

# Symantec™ Protection Suite Enterprise Edition

Comprehensive, powerful endpoint, messaging, and Web protection, for less money

## Data Sheet: Endpoint Security

### Overview

Securing your business is challenging, but made easier with Symantec™ Protection Suite Enterprise Edition. Powered by Symantec Insight™, Protection Suite protects with the fast, effective<sup>1</sup> endpoint security, combined with industry-leading messaging protection and Web security.

### Fast endpoint security

*Powered by Insight, confidently protects physical and virtual environments*

- **Patented technology**—Insight separates files at risk from those that are safe, for faster and more accurate malware detection, blocking more threats including mutating and zero-day.
- **Proactive threat protection**—SONAR examines programs as they run, identifying and stopping malicious behavior even for new and previously unknown threats.
- **Antivirus and antispware for Windows®, Linux®, and Macintosh®**— Provides unmatched malware protection, market-leading antivirus and spyware protection, new rootkit protection, reduced memory footprint, and blazing performance.
- **Network threat protection**—A rules-based firewall engine and Generic Exploit Blocking (GEB) block malware before it can enter a system.
- **Protection for virtual environments**—Integration with VMware vShield protects your virtual infrastructure with virtual image exception, resource leveling, shared Insight cache, virtual client tagging to optimize your virtual environment's security posture.

## Effective email and Web security

*Reduce upfront and on-going IT costs and forcing out unnecessary complexity*

- **Antispam and messaging security protection** from Symantec™ Messaging Gateway and Symantec™ Mail Security for Exchange blocks more than 99 percent of unwanted spam.
- **Content filtering of inbound and outbound** traffic for compliance with industry and government regulations.
- **Safeguard sensitive information** by identifying and controlling the flow of sensitive information via email and IM with advanced content filtering and data loss prevention.

---

## Multilayer protection from endpoint to gateway

Protect against more threats and secure your environment against data loss, malware, and spam by accurately identifying and addressing risks consistently across different platforms. Only Symantec provides the broad spectrum of core security protections across your endpoint, messaging, and Web infrastructure. Multiple layers of protection help ensure you are accurately identifying and addressing risks while delivering consistent protection in both physical and virtual environments.

**Fastest, most effective security**—Powered by Insight, you can confidently protect your infrastructure with industry-leading endpoint security, messaging and Web security, and data protection solutions built to secure your physical and virtual environments.

**Layered security and intelligence**—Efficiently manage your endpoint, mail systems, and Internet gateway security with real-time actionable intelligence across protection technologies.

**More protection, for less**—Increase the security posture across your IT infrastructure, while reducing upfront and on-going IT costs and force out unnecessary complexity.

---

## Fastest, most effective security

### *Endpoint security*

Protection Suite delivers more than industry-leading antivirus with advanced threat prevention that protects your endpoints—laptops, desktops, and servers— from targeted attacks and attacks not seen before. Proactive technologies automatically analyze application behaviors and network communications to detect and block suspicious activities, including administrative control features that allow you to deny specific devices and applications.

- **Multi-layer protection from endpoint to gateway**—Protect against more threats and secure your environment against data loss, malware, and spam by accurately identifying and addressing risks consistently across different platforms.
- **Unrivaled security**—Powered by Insight, Protection Suite detects new threats on endpoints and at the perimeter,

earlier and more accurately than signature or behavioral based solutions alone.

### **Layered security and intelligence**

#### ***Layered messaging and spam protection***

Identify emerging threats and accelerate time to protection based on relevant, actionable intelligence. Protection Suite delivers inbound and outbound messaging security, with accurate real-time antispam and antivirus protection, advanced content filtering, and data loss prevention. Protection Suite messaging security components can be deployed on your messaging server and at the gateway (physical or virtual appliance-based).

- **Context-aware security management**—Correlate data from endpoint, messaging and third-party security products with early warning alerts from the world's largest civilian threat intelligence network.

- **Virtually eliminate spam**—Block more than 99 percent of spam with less than 1 in a million false positives.
- **VMware® vShield integration**—The Shared Insight Cache functionality integrates with vShield Endpoint.

---

### More protection for less

*Maximize protection, minimize complexity, and stay under budget*

Protection suite is a cost efficient way to deploy security technologies across your IT infrastructure. Reduce upfront and on-going IT costs by forcing out complexity—Symantec technologies are centrally managed and work seamlessly together. Protection Suite also offers unparalleled Web security to fend off today's complex Web-borne malware threats. Web Gateway detects infected endpoints, monitors inbound and outbound Web traffic for threats, and enables you to safely use today's Web 2.0 applications.

- **Cost efficient**—Solve crucial security challenges across multiple threat vectors, while saving up to 70 percent over the purchase of individual point products.
- **Eliminate environment complexity**—Deploy essential endpoint, messaging, and Web security technologies as unified solutions.
- **Streamline processes**—Eliminate additional steps and costs with one decision, one purchase, and one vendor for comprehensive protection.

### Component Products of Protection Suite

The products included within the Protection Suite are:

- [Endpoint Protection](#)
- [Mail Security for Microsoft Exchange](#)
- [Messaging Gateway](#)
- [Web Gateway](#)

Get up-to-date [System Requirements](#) for Protection Suite or from [www.symantec.com](http://www.symantec.com).

- [Symantec Endpoint Protection](#) (Windows, Linux, and Macintosh)
- [Symantec Mail Security for Microsoft Exchange](#)
- [Symantec Messaging Gateway](#)
- [Symantec Web Gateway](#)

---

### Services

Symantec offers a range of consulting, technical education, and support services to guide organizations through the migration, deployment, and management of Protection Suite and help realize the full value of your investment. Essential Support Services provide confidence that critical assets are protected around the clock. For organizations that want to outsource security monitoring and management, Symantec also offers Symantec™ Managed Security Services to deliver real-time security protection.
